# COLUMBIAN

# ROPE AND TWINE

¶ Our name COLUMBIAN on cordage is recognized as the mark of excellence. It is only applied to cordage made of the best and purest materials. It is the standard for comparison wherever cordage is bought and sold.

¶ EUREKA Brand of cordage is a quality second to COLUMBIAN, but equal to many brands offered as first grade.

¶ COLUMBIAN and EUREKA products include all kinds of rope and commercial twines made from Manila, Sisal, Jute, Hemp and Flax Fibres.

We will be glad to send our Catalog, describing the manufacture of rope and twine, upon application.

# Cabot's
## Creosote Shingle Stains

**The Standard Stains for Shingles, Siding, Trimmings and Other Exterior Woodwork**

They are not merely thinned paints, but **real stains,** made of the strongest and finest pigments, without barytes, benzine or any other adulterant. The colors are therefore soft, rich and transparent, and guaranteed fast; and the Creosote thoroughly preserves the wood.

*Residence of Ralph Peters, Esq., President L. I. R. R.*

*Shingles stained with Cabot's Shingle Stains. Cement plaster stained with Cabot's Waterproof Cement Stains. Lined with Cabot's Quilt for warmth.*

*Aymar Embury II, Architect, Englewood, N. J.*

## Cabot's "Quilt"

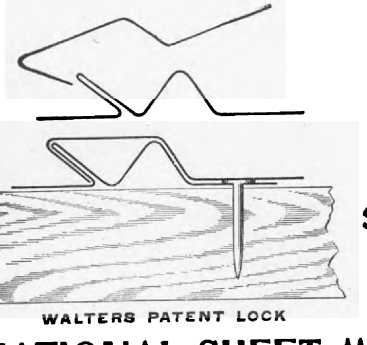
**Heat-Proof  Cold-Proof  Sound-Proof**

The warmest lining made. One layer is warmer than forty layers of common building paper. The most perfect sound-deadener. It breaks up and absorbs the sound-waves. Scientific, sanitary and uninflammable.

**Cabot's Waterproof Cement Stains.**
They artistically color and thoroughly waterproof all kinds of exterior cement work in one operation. Cost less than coatings, go twice as far and can be applied twice as fast. Cannot crack, chalk or peel, as they form no coating.

**Cabot's Waterproof Brick Stains.**
For waterproofing all brickwork and for coloring brickwork that needs coloring. Restores old, faded or mismatched brick to a natural, even brick tone. No painty effect.

## Cabot's Conservo Wood Preservative



**A Cheap and Efficient Preservative for All Exposed Lumber.**

**Samuel Cabot, Inc.,** SOLE MANUFACTURERS, **Boston, Mass., U. S. A.**

# Marion Steam Shovels

are the most powerful, economical and efficient Shovels ever built. We make them in all sizes, for either steam or electric power, and with railroad or traction trucks.

We can lower your working costs by supplying machines that give best results at lowest maintenance cost.

Our Standard Shovels are built with dipper capacities ranging from ¾ to 6 cubic yards.

Our Revolving Shovels are of three sizes: ½-yd., ¾-yd. and 1¼-yd.

**We are the sole builders of the "MARION" Excavating Machinery**

**Dipper Dredges Elevator Dredges Scraper Bucket Excavators Ballast Unloaders**

# IF IT'S STAMPING OR DRAWING ASK US ABOUT IT

We do not care to make Stampings as small as paper clips or as large as automobile frames—but anything in between we probably can and will make. All Stamping or Drawing work is to order. In general we desire work in which accuracy and finish count—the better grade of Stampings. Much of our work is the making of Automobile Parts of all kinds. We very often devise methods and tools for doing Stamping that has never been done before—and we have shown many people how to use stampings in place of forgings or castings, and by so doing save money.

*In asking for prices please send accurate drawing or a sample and say how many pieces you REALLY want in the FIRST order.*

"Always Reliable"

Our No. 25 Torch

Best in the Market!

This Torch is far superior to any other Torch with pump in body; having in addition to the regular automatic cork check a positive shut-off by screwing down pump plunger, which closes the needle valve in bottom of pump. Patented. Packed one in wooden box, properly labeled. Write for our Catalog No. 20, on Furnaces and Torches, also Catalog No. 5 on Plumbers' Tools, etc.

# It's Printype!

**"What a beautiful typewritten letter--as plain as print--as easy to read as a primer! It must be the new Oliver PRINTYPE! I wish all our correspondents used The Printype Oliver Typewriter!"**
***--A composite quotation from ten thousand business and professional men on being introduced to Printype.***

ALL eyes are watching Printype. Its attraction is irresistible. Its beauty and grace, in a typewritten letter, are alluring, attention-compelling. Although absolutely new to **typewriting,** its counterpart—Book Type—has been used on all the world's presses since the printing art had its inception. It is the Oliver ideal of perfect typography applied to typewriter uses.

We had brought the machine to its maximum of efficiency. We had added, one by one, a score of great innovations. There remained but one point—that was **the type itself.**

Then came the inspiration which meant **a revolution in typewriter type.** We would design and produce a new typewriter type face, conforming to the type used in newspapers, magazines and books.

We did! It's here! It's PRINTYPE!

Printype is not an experiment. It is, in all essentials, the type that meets your eye when you read your morning paper, your magazine or your favorite novel. Now that Printype is an accomplished fact, the thought occurs to thousands, why didn't typewriter manufacturers think of it years ago? The same question was asked when, over ten years ago, we introduced **visible writing.**

## A Long Step in Advance

The change from the old-style thin outline letters known as Pica Type, universally used up to now on all standard typewriters, to the new, beautiful, readable Printype, is one of vast significance. It means relief from the harmful effect on eyesight of the "outline" typewriter type. For Printype is as easy to read as a child's primer.

The OLIVER Typewriter
*The Standard Visible Writer*

It means less liability of mis-reading, due to blurring of outline letters, whose sameness frequently makes the words run together. Printype letters are **shaded,** just as Book Type is shaded.

It means less danger of costly errors, due to confusing the numerals. No possible chance of mistaking 3 for 8 or 5 for 3—each figure is distinct. It means a degree of typographic beauty never before known in typewriting.

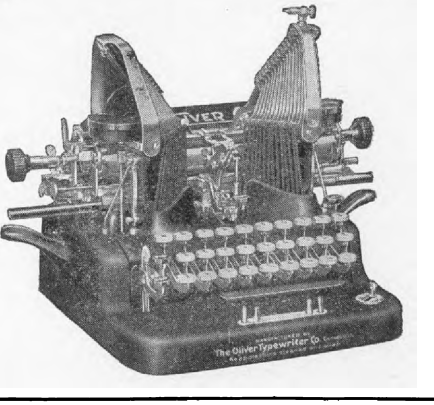
And now, because of its **newness,** it has the enhanced charm of **novelty.**

## Printype Now Famous

The reception of **Printype** by the business public has been most enthusiastic. We withheld any formal announcement until the machine had been on the market for one year. Personal demonstrations were its only advertising. The resulting sales were stupendous. Printype letters soon began to appear among commonplace old-style correspondence. Wherever received, these mysterious, distinctive, beautiful letters awakened immediate interest. Business men began asking each other, **"What's that new kind of typewriter that writes like real print?"** Thus the fame of Printype grows as its beauty and utility dawn on the business world.

## Printype Aids Eyes

The manifold merits of Printype are a constant source of surprise. Printype is restful to eyesight. It delivers its message in the most easily readable form.



The constant reading of thin outline letter typewriting plays havoc with the eyes. It sends thousands to oculists and opticians.

A comparative test of Printype and ordinary typewriting will win you to **the type that reads like print.**

## We Have Not Raised Our Price

We do not ask a premium for The Printype Oliver Typewriter. We have declared a big dividend in favor of typewriter users by supplying this wonderful type, when desired, on the new model Oliver Typewriter.

Our price is $100, the same as our regular model with Pica Typewriter Type.

## Ask for Book, Specimen Letter and Demonstration

We will gladly send you a Printype Book, together with **a letter written** on The Printype Oliver Typewriter. This letter will be a revelation.

Our great sales organization enables us to make an improvement of this character **immediately and simultaneously available to the public.** Press the button and see how quickly an Oliver Agent will appear with a "Printyper," ready to tell you all about it and write several Printype letters for you. # Rothchild

# Rotary Gate Blow-off Valve

**The specification of Plumbing, Steam Fitting and Engineering Supplies that bear the "Simmons Mark" is an insurance against dissatisfaction, a guarantee of efficiency and highest standard of quality.**

### The Rothchild Rotary Gate Blow-Off Valve

is a marked improvement over any other class of Blow-Off Valve in use. It is guaranteed to be the **only valve ever made** that will positively hold steam, water, ammonia, gas, oil or other fluids, **hot** or **cold.** It is specified for use on all big installations where only highly dependable fittings are required.

### The Rothchild Rotary Gate Blow-Off Valve

has been subjected to severe tests---tests that have proven conclusively their complete efficiency and dependability. It is recognized as the **"Standard of the Valve World"** by the most eminent engineers of the century.

Let us tell you more about it.

## SIMMONS LOCKNUT PLATES

are made of **cast iron** and brass and designed for use in either concrete or wood flooring. On every installation they have met with the greatest satisfaction. The extended sleeve makes an absolutely water-tight joint and prevents water from dripping to floor below when concret flooring is flushed.

It protects wood flooring from super-heated steam or hot-water pipes. The pipe sleeve can be made from ANY PIPE you have on hand by threading at both ends.

They are also adapted to side walls in gas, water or steam installations.

# JUST TRY IT!

You pay nothing—promise nothing—until a 30-day trial of a White Star Oil Filter has convinced you that it is exactly what you have needed in your power plant.

## The "White Star" Oil Filter

will thoroughly and quickly purify oil that you have used on your machinery bearings. It isn't necessary to throw oil away because it has been used once. Simply collect the dirty oil, and put it into a White Star Filter—it will do the rest.

After passing through a White Star Filter, your oil will be as good as new, and you'll be surprised at the saving.

# Why Throw Dollars Out the Window?

Did you ever stop to consider the cost of wasted heat—the heat that goes out through the open window? It is easy to open the window when the room becomes too warm, but it costs money—you pay for it in your coal bills.

With the **Gorton Quick Opening Packless Valve,** it is much easier to turn off a radiator than to open a window. One-third of a turn of the lever handle opens or closes the valve, thus giving absolute control of the heat in each room to suit the occupant without opening a window.

Controlling the heat at the radiator means a saving at the coal pile—by saving coal you save money.

***Our booklet gives the information, it is yours free for the asking.***

## SKYLIGHTS

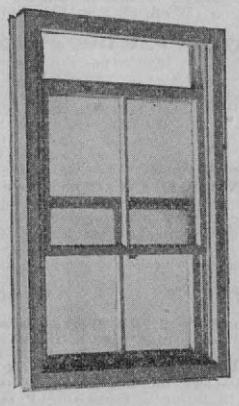
There is "quality" in Skylights the same as in clothing, they must be built to wear. A Skylight in addition to producing light must be impervious to weather conditions--rain or snow--heat or cold. WE have miles of "CANTON" Skylights in service. Write us before you buy.

## PURE AIR—

and perfect ventilation is insured the industrial or public buildings equipped with

## CANTON VENTILATORS

—the design insures it. The foul and fume-laden air is drawn quickly "up and out." No sharp turns that act as baffle plates to the out-rushing air, but long easy, direct curves that allow free exit. Write for booklet, it shows the details, also tells about the automatic closing features in case of FIRE.



**TYPES FOR EVERY SERVICE**

**Copper or Galvanized Iron**

## METAL CEILING

Today—It is not a question of the suitability of metal Ceilings but a matter of design. They are in use the world over—homes—churches—theatres—lodges—and public and private institutions of all kinds. We have studied the Ceiling business from the artistic side and have produced patterns especially suited to every character of room.

Tell us your requirements and we will submit our catalog indicating the most suitable selections—at no expense to you.

## FIREPROOF WINDOWS

Canton Metal Windows represent the highest standard in design and construction. Built on the latest approved lines as laid down by the **National Board of Underwriters.** They are Adjustable—Simple—Durable. It's to your interest to let us figure on your requirements.

## THE WAGON WITH THE CHUCKLE

Every teamster listens for the chuckle—it tells him the story of a dump wagon's running qualities. The louder the chuckle the easier it runs.

Every TROY has the tell-tale chuckle. We build TROYS in every size and capacity—we have a model exactly suited to your needs. No matter which one you buy, you'll find it the easiest running wagon on the market. It's also right in every other way, including price. Get Catalog H.

## THE BOX WITH STEEL DOORS

A dump box with wood doors can't be absolutely satisfactory. Wet weather or wet loads are sure to shrink or swell the wood—then the box leaks. TROY Boxes have four sheet steel doors— they can't split, wear out or warp.

TROYS fit—they seem a part of the gear. And they always work quickly and smoothly. We can make a dump wagon out of your gear—let us tell you all about our Boxes.

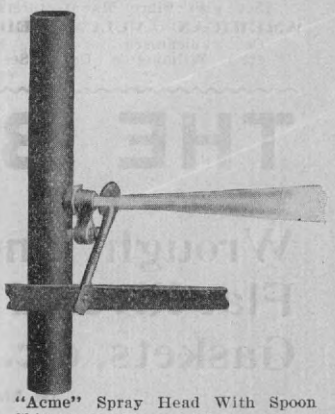
"Acme" Spray Head in Operation

Long Distance 'Phone, Monroe 5941

The Efficiency of An
**Air, Smoke & Gas Washing Apparatus**
Is Determined By Its
**SPRAY HEAD**
Note the Following Important Features in the
**"ACME" SYSTEM**
Wherein We Surpass All Other Designs



EFFECTIVENESS OF SPRAY

(1) Sprays form two sheets of water across chamber. (2) Water thrown in solid sheets and not vaporized. (3) Nozzles distributed so that the resistance to the current of air is uniform throughout the entire section of spray chamber. (4) Complete saturation of the air—impossible during warm weather, insuring a minimum percentage of humidity.

NOTE DIRECT & FREE PASSAGE OF WATER THROUGH THE NOZZLE

Resistance to discharge of water a minimum. No pockets to retain dirt. Positive and easy method of flushing spray pipes. Automatic flushing attachment. Material—Brass—will not corrode. Durability and simplicity of construction.

The services of our engineering department are available to contractors contemplating heating, ventilating, cooling and humidification systems.

## 13001—Welding (Autogenous)

American Oxygen Co. ("Oxy-Acetylene), Perry bldg, Phila., Pa. Works: Camden, N. J.

# GOODYEAR Oxy - Acetylene Equipment

This equipment is high grade—refined to perfect simplicity, strong in construction and reliable in operation. Action is entirely automatic. The Acetylene is generated by feeding Carbide in limited quantities into a relatively large body of water. Thus generation is cool and the breaking down of the Acetylene into other Hydro-Carbons requiring more Oxygen than pure Acetylene, is avoided.

### CHEMICALLY PURE ACETYLENE

Due to impurities in Carbide all Acetylene gas contains Phosphuretted and Sulphuretted Hydrogen, seriously affecting welds of iron and steel. All Goodyear generators are equipped with chemical purifiers, which, at trifling cost, eliminate these impurities completely.

### COMPLETENESS

We supply complete equipment, including Blow-Pipes and Oxygen supply—all as scientifically correct as the Acetylene generator.

# RESISTANCE ALLOYS ROUND WIRE AND RIBBON

**"NICHROME"**
Resistance 60 times Copper.
*A boon to the Heating Trade*
An alloy of unusual merit — capable of withstanding extremely high temperatures without oxidation. Designed especially and highly efficient for use in Electrically Heated Appliances generally.

**"ADVANCE"**
Temperature Coefficient Nil.
A Copper Nickel alloy containing no Zinc—has large current carrying capacity, and is strictly non-corrosive. Used largely in measuring instruments —Resistance Units, etc.

**"CLIMAX"**
Resistance 50 times Copper.
An alloy of High Resistance with Low Temperature Co-efficient — Recommended for Rheostats — Controllers — Resistance Units and other similar devices.

## Important

The system of indexing the contents of this publication has been changed. In all previous editions the numbers following the classifications referred the inquirer to the page number on which the article was classified, while the system adopted for indexing the contents for this and future editions, is so numbered that they refer direct to the classification, consequently the page numbers of the book have no connection whatever with the numbers used in the index of contents. With this system there should be no difficulty in locating the manufacturers of any article listed in our Register.

## PACIFIC BUILDER AND ENGINEER

***A WEEKLY TRADE JOURNAL*** Is the leading authority on construction in the NORTHWEST. It is officially recognized by the Building Organizations and by the Engineering Trades as being without competition in this field. Contains all the latest construction news.

If interested in the development of the GREATER NORTHWEST you cannot afford to be without it. If looking for a market for your products in this field it offers you the best medium for reaching the buyers.

***SUBSCRIBERS and READERS*** Comprise 90 per cent. of all those identified with constructional development of the GREATER NORTHWEST.

***GREATER NORTHWEST*** Washington, Idaho, Oregon, Alaska, Montana, British Columbia

***CIRCULATION*** 2,800 copies every week are mailed to regular subscribers, advertisers, libraries, newstands, owners and to business prospects.

## POWER, MINE AND FACTORY

A *monthly* publication—devoted particularly to exploiting the latest and most approved types of machinery for Power Plants, Mines and Factories in the Greater Northwest, Alaska and British Columbia. It deals with the economical problems in this field and contains many articles of vital interest to the manufacturer, mining and machinery man, and reaches the owner, manager, superintendent, engineer and electrician. It is read and studied by the man at the *throttle*.

As an advertising medium, Power, Mine and Factory has no competitor in this fast developing territory. It has a circulation exceeding 12,000 monthly, and numbers among its advertisers many representative concerns seeking the extension or increase of their sales in this field.

## CHAPTERS ON ARCHITECTURE

A new monthly magazine—presenting in descriptive and pictorial form, some subjects pertaining directly or indirectly to architecture, calculated to be of interest and profit not especially to practitioners of the profession, but more particularly to the increasing number of people who find in architecture a source of pleasure.

It is intended to be not simply a collection or review of contemporaneous achievements, but rather a commentary of our own social and civic progress as expressed in our architecture in comparison with that of other countries and other times.

It also treats of practical matters pertaining to the execution of present day structures and offers in connection therewith, useful and interesting information.

The letter press and illustrations will add to the enjoyment of those who may peruse its pages. The field is new and its cultivation promising.

For the advertising of quality products—Chapters on Architecture offers both a new and an exceptional opportunity.
